

THE ASTROPHYSICAL JOURNAL SUPPLEMENT

AUTHOR INDEX

VOLUME 127

2000 MARCH TO APRIL

- ABDALLAH, J., JR. See PERRY, T. S., et al. Opacity Measurements in a Hot Dense Medium on the Nova Laser.
- ADELBERGER, KURT L. See HOGG, DAVID W., et al. Caltech Faint Field Galaxy Redshift Survey. IX. Source Detection and Photometry in the Hubble Deep Field Region.
- ALON, U. Statistical Mechanics Merger Model for Hydrodynamic Instabilities. *A. Rikanati, D. Oron, U. Alon, & D. Shvarts.* 127, 451 (2000)
- Studies on the Nonlinear Evolution of the Richtmeyer-Meshkov Instability. *O. Sadot, L. Erez, D. Oron, G. Erez, G. Ben-Dor, U. Alon, L. A. Levin, & D. Shvarts.* 127, 469 (2000)
- AMATI, L. See FRONTERA, F., et al. Prompt and Delayed Emission Properties of Gamma-Ray Bursts Observed with *BeppoSAX*.
- ARNETT, D. The Role of Mixing in Astrophysics. *D. Arnett.* 127, 213 (2000)
- Supernova Experiments on the Nova Laser. *J. Kane, D. Arnett, B. A. Remington, S. G. Glendinning, G. Bazan, R. P. Drake, & B. A. Fryxell.* 127, 365 (2000)
- ARNETT, DAVID. Introduction: Second International Workshop on Laboratory Astrophysics with Intense Lasers. *Bruce A. Remington, R. Paul Drake, David Arnett, & Hideaki Takabe.* 127, 211 (2000)
- AZECHI, H. Formation of Initial Perturbation of Rayleigh-Taylor Instability in Supernovae and Laser-irradiated Targets—Is There Any Similarity? *H. Azuchi, K. Shigemori, M. Nakai, N. Miyanaga, & H. Takabe.* 127, 219 (2000)
- BACH, D. R. See PERRY, T. S., et al. Opacity Measurements in a Hot Dense Medium on the Nova Laser.
- Temperature and Density Measurements of the Collision of Two Plasmas. *T. S. Perry, R. I. Klein, D. R. Bach, K. S. Budil, R. Cauble, H. N. Kornblum, Jr., R. J. Wallace, & R. W. Lee.* 127, 437 (2000)
- BACH, DAVID R. Interaction of Supernova Remnants with Interstellar Clouds: From the Nova Laser to the Galaxy. *Richard I. Klein, Kimberly S. Budil, Theodore S. Perry, & David R. Bach.* 127, 379 (2000)
- BACHELIER, ANNICK. See CHENAIS-POPOVICS, CLAUDE, et al. Opacity Studies on Iron in the 15–30 eV Temperature Range.
- BACK, C. A. Implosions: An Experimental Testbed for High-Energy Density Physics. *C. A. Back, N. C. Woolsey, T. Missalla, O. L. Landen, S. B. Libby, L. S. Klein, & R. W. Lee.* 127, 227 (2000)
- BALDIS, H. A. Modeling of Thomson Scattering Spectra in High- z , Laser-produced Plasmas. *W. Rozmus, S. H. Glenzer, K. G. Estabrook, H. A. Baldis, & B. J. MacGowan.* 127, 459 (2000)
- BALDIS, HECTOR A. High-Intensity Scattering Processes of Relativistic Electrons in Vacuum and Their Relevance to High-Energy Astrophysics. *Frederic V. Hartemann, Anthony L. Troha, Hector A. Baldis, Atul Gupta, Arthur K. Kerman, Eric C. Landahl, Neville C. Luhmann, Jr., & James R. Van Meter.* 127, 347 (2000)
- BARRINGER, L. Study of Super- and Subsonic Ionization Fronts in Low-Density, Soft X-Ray-irradiated Foam Targets. *O. Willi, L. Barringer, C. Vickers, & D. Hoarty.* 127, 527 (2000)
- BATANI, DIMITRI. See KOENIG, MICHEL, et al. EOS Data Experiments for Plastic Foams Using Smoothed Laser Beams.
- BAUCHE, JACQUES. See CHENAIS-POPOVICS, CLAUDE, et al. Opacity Studies on Iron in the 15–30 eV Temperature Range.
- BAUCHE-ARNOUT, CLAIRE. See CHENAIS-POPOVICS, CLAUDE, et al. Opacity Studies on Iron in the 15–30 eV Temperature Range.
- BAZAN, G. Supernova Experiments on the Nova Laser. *J. Kane, D. Arnett, B. A. Remington, S. G. Glendinning, G. Bazan, R. P. Drake, & B. A. Fryxell.* 127, 365 (2000)
- BELL, PERRY M. See BUDIL, KIMBERLY S., et al. Development of a Radiative-Hydrodynamics Testbed Using the Petawatt Laser Facility.
- BEN-DOR, G. Studies on the Nonlinear Evolution of the Richtmeyer-Meshkov Instability. *O. Sadot, L. Erez, D. Oron, G. Erez, G. Ben-Dor, U. Alon, L. A. Levin, & D. Shvarts.* 127, 469 (2000)
- BENUZZI, ALESSANDRA. See KOENIG, MICHEL, et al. EOS Data Experiments for Plastic Foams Using Smoothed Laser Beams.
- BINGHAM, R. X-Ray Emission from Comets, Cometary Knots, and Supernova Remnants. *R. Bingham, B. J. Kellett, J. M. Dawson, V. D. Shapiro, & D. A. Mendis.* 127, 233 (2000)
- Neutrino Kinetics in Dense Astrophysical Plasmas. *L. O. Silva, R. Bingham, J. M. Dawson, J. T. Mendonça, & P. K. Shukla.* 127, 481 (2000)
- BLANDFORD, ROGER. See HOGG, DAVID W., et al. Caltech Faint Field Galaxy Redshift Survey. IX. Source Detection and Photometry in the Hubble Deep Field Region.
- BLENSKI, T. Photoabsorption in Dense Plasmas. *T. Blenski.* 127, 239 (2000)
- BLENSKI, THOMAS. See CHENAIS-POPOVICS, CLAUDE, et al. Opacity Studies on Iron in the 15–30 eV Temperature Range.
- BOUQUET, SERGE. Analytical Study and Structure of a Stationary Radiative Shock. *Serge Bouquet, Romain Teyssier, & Jean Pierre Chieze.* 127, 245 (2000)
- BOZIER, J. C. A New Supercritical Shock Wave Regime. *J. C. Bozier, J. P. Le Breton, T. Jalinaud, & J. Valadon.* 127, 253 (2000)
- BROWN, CURTIS. See BUDIL, KIMBERLY S., et al. Development of a Radiative-Hydrodynamics Testbed Using the Petawatt Laser Facility.
- BUDIL, K. S. See CAUBLE, R., et al. Equation of State and Material Property Measurements of Hydrogen Isotopes at the High-Pressure, High-Temperature Insulator-Metal Transition.
- See GLENDINNING, S. G., et al. Experimental Measurements of Hydrodynamic Instabilities on Nova of Relevance to Astrophysics.
- See GOLD, D. M., et al. Interferometric and Chirped Optical Probe Techniques for High-Pressure Equation-of-State Measurements.
- Temperature and Density Measurements of the Collision of Two Plasmas. *T. S. Perry, R. I. Klein, D. R. Bach, K. S. Budil, R. Cauble, H. N. Kornblum, Jr., R. J. Wallace, & R. W. Lee.* 127, 437 (2000)
- BUDIL, KIMBERLY S. Development of a Radiative-Hydrodynamics Testbed Using the Petawatt Laser Facility. *Kimberly S. Budil, David M. Gold, Kent G. Estabrook, Bruce A. Remington, Jave Kane, Perry J. Bell, Deanna M. Pennington, Curtis Brown, Stephen P. Hatchett, Jeffrey A. Koch, Michael H. Key, & Michael D. Perry.* 127, 261 (2000)
- Interaction of Supernova Remnants with Interstellar Clouds: From the Nova Laser to the Galaxy. *Richard I. Klein, Kimberly S. Budil, Theodore S. Perry, & David R. Bach.* 127, 379 (2000)
- CALLAS, J. L. See LING, J. C., et al. A BATSE Earth Occultation Catalog of 0.03–1.8 MeV Gamma-Ray Source Spectra and Light Curves for Phases 1–3 (1991–1994).
- CAON, NICOLA. A Survey of the Interstellar Medium in Early-Type Galaxies. III. Stellar and Gas Kinematics. *Nicola Caon, Duccio Macchetto, & Miriani Pastoriza.* 127, 39 (2000)
- CAROLL, J. J., III. See DRAKE, R. P., et al. Progress toward the Laboratory Simulation of Young Supernova Remnants.
- CASTRO-TIRADO, A. See FRONTERA, F., et al. Prompt and Delayed Emission Properties of Gamma-Ray Bursts Observed with *BeppoSAX*.
- CAUBLE, R. Equation of State and Material Property Measurements of Hydrogen Isotopes at the High-Pressure, High-Temperature Insulator-Metal Transition. *R. Cauble, P. M. Celliers, G. W. Collins, L. B. da Silva, D. M. Gold, M. E. Foord, K. S. Budil, R. J. Wallace, & A. Ng.* 127, 267 (2000)
- See GOLD, D. M., et al. Interferometric and Chirped Optical Probe Techniques for High-Pressure Equation-of-State Measurements.
- Temperature and Density Measurements of the Collision of Two Plasmas. *T. S. Perry, R. I. Klein, D. R. Bach, K. S. Budil, R. Cauble, H. N. Kornblum, Jr., R. J. Wallace, & R. W. Lee.* 127, 437 (2000)
- CELLIERS, P. M. See CAUBLE, R., et al. Equation of State and Material Property Measurements of Hydrogen Isotopes at the High-Pressure, High-Temperature Insulator-Metal Transition.

- See GOLD, D. M., et al. Interferometric and Chirped Optical Probe Techniques for High-Pressure Equation-of-State Measurements.
- CHANDLER, E. A. See KALANTAR, D. H., et al. Developing Solid-State Experiments on the Nova Laser.
- CHEN, S.-Y. See UMSTADTER, D., et al. Dense and Relativistic Plasmas Produced by Compact High-Intensity Lasers.
- CHENAIS-POPOVICS, CLAUDE. Opacity Studies on Iron in the 15–30 eV Temperature Range. *Claude Chenaïs-Popovics, Hamed Merdji, Thomas Missalla, Franck Gilleron, Jean-Claude Gauthier, Thomas Blenski, François Perrot, Marcel Klapisch, Claire Bauche-Arnoult, Jacques Bauche, Annick Bachelier, & Klaus Eidmann*. 127, 275 (2000)
- CHERFILS, C. See GLENDINNING, S. G., et al. Experimental Measurements of Hydrodynamic Instabilities on Nova of Relevance to Astrophysics.

SUBJECT INDEX

VOLUME 127

2000 MARCH TO APRIL

ACCELERATION OF PARTICLES

High-Intensity Scattering Processes of Relativistic Electrons in Vacuum and Their Relevance to High-Energy Astrophysics. *Frederic V. Hartemann, Anthony L. Troha, Hector A. Baldis, Atul Gupta, Arthur K. Kerman, Eric C. Landahl, Neville C. Luhmann, Jr., & James R. Van Meter.* 127, 347 (2000)

Vortex Dynamics of a Twice-accelerated Interface in an Incompressible Ideal Fluid. *Alexei D. Kotelnikov & Norman J. Zabusky.* 127, 389 (2000)

Dense and Relativistic Plasmas Produced by Compact High-Intensity Lasers. *D. Umstadter, S.-Y. Chen, G. Ma, A. Maksimchuk, G. Mourou, M. Nantel, S. Pikuz, G. Sarkisov, & R. Wagner.* 127, 513 (2000)

ATOMIC DATA

Opacity Studies on Iron in the 15–30 eV Temperature Range. *Claude Chenaïs-Popovics, Hamed Merdji, Thomas Missalla, Franck Gilleron, Jean-Claude Gauthier, Thomas Blenski, François Perrot, Marcel Klapisch, Claire Bauche-Arnoult, Jacques Bauche, Annick Bachelier, & Klaus Eidmann.* 127, 275 (2000)

Opacity Measurements in a Hot Dense Medium on the Nova Laser. *T. S. Perry, S. J. Davidson, F. J. D. Serduke, D. R. Bach, C. C. Smith, J. M. Foster, R. J. Doyas, R. A. Ward, C. A. Iglesias, F. J. Rogers, J. Abdallah, Jr., R. E. Stewart, R. J. Wallace, J. D. Kilkenny, & R. W. Lee.* 127, 433 (2000)

ATOMIC PROCESSES

Equation of State and Material Property Measurements of Hydrogen Isotopes at the High-Pressure, High-Temperature Insulator-Metal Transition. *R. Cauble, P. M. Celliers, G. W. Collins, L. B. da Silva, D. M. Gold, M. E. Foord, K. S. Budil, R. J. Wallace, & A. Ng.* 127, 267 (2000)

Opacity Studies on Iron in the 15–30 eV Temperature Range. *Claude Chenaïs-Popovics, Hamed Merdji, Thomas Missalla, Franck Gilleron, Jean-Claude Gauthier, Thomas Blenski, François Perrot, Marcel Klapisch, Claire Bauche-Arnoult, Jacques Bauche, Annick Bachelier, & Klaus Eidmann.* 127, 275 (2000)

The Sun as an Equation-of-State Laboratory. *Werner Däppen & Alan Nayfonov.* 127, 287 (2000)

The Production of Strong Blast Waves through Intense Laser Irradiation of Atomic Clusters. *T. Ditmire, K. Shigemori, B. A. Remington, K. Estabrook, & R. A. Smith.* 127, 299 (2000)

Modeling of Thomson Scattering Spectra in High-z, Laser-produced Plasmas. *W. Rozmus, S. H. Glenzer, K. G. Estabrook, H. A. Baldis, & B. J. MacGowan.* 127, 459 (2000)

CATALOGS

A Visual Search for Galaxies in a Milky Way Region around the North Supergalactic Pole. *Adel T. Roman, Ikuru Iwata, & Mamoru Saitō.* 127, 27 (2000)

A BATSE Earth Occultation Catalog of 0.03–1.8 MeV Gamma-Ray Source Spectra and Light Curves for Phases 1–3 (1991–1994). *J. C. Ling, Wm. A. Wheaton, P. Waltyn, R. T. Skelton, Wm. A. Mahoney, R. G. Radocinski, J. L. Callas, N. F. Ling, E. Turner, & R. Shubert.* 127, 79 (2000)

COMETS: GENERAL

X-Ray Emission from Comets, Cometary Knots, and Supernova Remnants. *R. Bingham, B. J. Kellett, J. M. Dawson, V. D. Shapiro, & D. A. Mendis.* 127, 233 (2000)

CONVECTION

Three-dimensional Simulations of Turbulent Compressible Convection. *David H. Porter & Paul R. Woodward.* 127, 159 (2000)

Self-shielded Downflows in Core-Collapse Supernovae: Prospects for Laser Experiments. *Chris L. Fryer.* 127, 317 (2000)

COSMOLOGY: LARGE-SCALE STRUCTURE OF THE UNIVERSE

A Visual Search for Galaxies in a Milky Way Region around the North Supergalactic Pole. *Adel T. Roman, Ikuru Iwata, & Mamoru Saitō.* 127, 27 (2000)

COSMOLOGY: OBSERVATIONS

Caltech Faint Field Galaxy Redshift Survey. IX. Source Detection and Photometry in the Hubble Deep Field Region. *David W. Hogg, Michael A. Pahre, Kurt L. Adelberger, Roger Blandford, Judith G. Cohen, T. N. Gautier, Thomas Jarrett, Gerry Neugebauer, & Charles C. Steidel.* 127, 1

Pahre, Kurt L. Adelberger, Roger Blandford, Judith G. Cohen, T. N. Gautier, Thomas Jarrett, Gerry Neugebauer, & Charles C. Steidel. 127, 1 (2000)

EDITORIALS, NOTICES

Introduction: Second International Workshop on Laboratory Astrophysics with Intense Lasers. *Bruce A. Remington, R. Paul Drake, David Arnett, & Hideaki Takabe.* 127, 211 (2000)

ELEMENTARY PARTICLES

Photoabsorption in Dense Plasmas. *T. Blenski.* 127, 239 (2000)

Self-shielded Downflows in Core-Collapse Supernovae: Prospects for Laser Experiments. *Chris L. Fryer.* 127, 317 (2000)

Neutrino Kinetics in Dense Astrophysical Plasmas. *L. O. Silva, R. Bingham, J. M. Dawson, J. T. Mendonça, & P. K. Shukla.* 127, 481 (2000)

Gamma-Ray Bursts: Afterglow, High-Energy Cosmic Rays, and Neutrinos. *Eli Waxman.* 127, 519 (2000)

EQUATION OF STATE

Equation of State and Material Property Measurements of Hydrogen Isotopes at the High-Pressure, High-Temperature Insulator-Metal Transition. *R. Cauble, P. M. Celliers, G. W. Collins, L. B. da Silva, D. M. Gold, M. E. Foord, K. S. Budil, R. J. Wallace, & A. Ng.* 127, 267 (2000)

The Sun as an Equation-of-State Laboratory. *Werner Däppen & Alan Nayfonov.* 127, 287 (2000)

Interferometric and Chirped Optical Probe Techniques for High-Pressure Equation-of-State Measurements. *D. M. Gold, P. M. Celliers, G. W. Collins, K. S. Budil, R. Cauble, L. B. da Silva, M. E. Foord, R. E. Stewart, R. J. Wallace, & D. Young.* 127, 333 (2000)

EOS Data Experiments for Plastic Foams Using Smoothed Laser Beams. *Michel Koenig, Alessandra Benuzzi, Bernard Faral, Dimitri Batani, Laura Müller, Flavia Torsiello, Tom Hall, Nicolas Grandjouan, & Wigen Nazarov.* 127, 385 (2000)

GALAXIES: ACTIVE

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

GALAXIES: ELLIPTICAL AND LENTICULAR, CD

A Survey of the Interstellar Medium in Early-Type Galaxies. III. Stellar and Gas Kinematics. *Nicola Caon, Duccio Macchetto, & Miriani Pastoriza.* 127, 39 (2000)

GALAXIES: EVOLUTION

Caltech Faint Field Galaxy Redshift Survey. IX. Source Detection and Photometry in the Hubble Deep Field Region. *David W. Hogg, Michael A. Pahre, Kurt L. Adelberger, Roger Blandford, Judith G. Cohen, T. N. Gautier, Thomas Jarrett, Gerry Neugebauer, & Charles C. Steidel.* 127, 1 (2000)

GALAXIES: FUNDAMENTAL PARAMETERS

Caltech Faint Field Galaxy Redshift Survey. IX. Source Detection and Photometry in the Hubble Deep Field Region. *David W. Hogg, Michael A. Pahre, Kurt L. Adelberger, Roger Blandford, Judith G. Cohen, T. N. Gautier, Thomas Jarrett, Gerry Neugebauer, & Charles C. Steidel.* 127, 1 (2000)

GALAXIES: INDIVIDUAL

Name: **Markarian 501**

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: 3C 66A

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: 3C 273

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: 3C 279

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: 3C 390.3

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: 3C 446

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: CTA 102

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: OJ 287

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: PG 1418+546

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: PKS 0235+164

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: PKS 0528+134

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: PKS 0735+178

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: PKS 0736+017

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: PKS 0754+100

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

Alphanumeric: PKS 1156+295

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

GALAXIES: ISM

A Survey of the Interstellar Medium in Early-Type Galaxies. III. Stellar and Gas Kinematics. *Nicola Caon, Duccio Macchetto, & Miriani Pastoriza.* 127, 39 (2000)

GALAXIES: KINEMATICS AND DYNAMICS

A Survey of the Interstellar Medium in Early-Type Galaxies. III. Stellar and Gas Kinematics. *Nicola Caon, Duccio Macchetto, & Miriani Pastoriza.* 127, 39 (2000)

GALAXIES: PHOTOMETRY

Caltech Faint Field Galaxy Redshift Survey. IX. Source Detection and Photometry in the Hubble Deep Field Region. *David W. Hogg, Michael A. Pahre, Kurt L. Adelberger, Roger Blandford, Judith G. Cohen, T. N. Gautier, Thomas Jarrett, Gerry Neugebauer, & Charles C. Steidel.* 127, 1 (2000)

Optical Variability of Blazars. *K. K. Ghosh, B. D. Ramsey, A. C. Sadun, & S. Soundararajaperumal.* 127, 11 (2000)

GALAXIES: STATISTICS

A Visual Search for Galaxies in a Milky Way Region around the North Supergalactic Pole. *Adel T. Roman, Ikuru Iwata, & Mamoru Saitō.* 127, 27 (2000)

GAMMA RAYS: BURSTS

Prompt and Delayed Emission Properties of Gamma-Ray Bursts Observed with BeppoSAX. *F. Frontera, L. Amati, E. Costa, J. M. Muller, E. Pian, L. Piro, P. Soffitta, M. Tavani, A. Castro-Tirado, D. Dal Fiume, M. Feroci, J. Heise, N. Masetti, L. Nicastro, M. Orlandini, E. Palazzi, & R. Sari.* 127, 59 (2000)

Development of a Radiative-Hydrodynamics Testbed Using the Petawatt Laser Facility. *Kimberly S. Budil, David M. Gold, Kent G. Estabrook, Bruce A. Remington, Jave Kane, Perry M. Bell, Deanna M. Pennington, Curtis Brown, Stephen P. Hatchett, Jeffrey A. Koch, Michael H. Key, & Michael D. Perry.* 127, 261 (2000)

Testing the Gamma-Ray Burst Blast-Wave Model: A Primer. *A. Crider & E. P. Liang.* 127, 283 (2000)

Gamma-Ray Bursts: Afterglow, High-Energy Cosmic Rays, and Neutrinos. *Eli Waxman.* 127, 519 (2000)

GAMMA RAYS: OBSERVATIONS

Prompt and Delayed Emission Properties of Gamma-Ray Bursts Observed with BeppoSAX. *F. Frontera, L. Amati, E. Costa, J. M. Muller, E. Pian, L. Piro, P. Soffitta, M. Tavani, A. Castro-Tirado, D. Dal Fiume, M. Feroci, J. Heise, N. Masetti, L. Nicastro, M. Orlandini, E. Palazzi, & R. Sari.* 127, 59 (2000)

A BATSE Earth Occultation Catalog of 0.03–1.8 MeV Gamma-Ray Source Spectra and Light Curves for Phases 1–3 (1991–1994). *J. C. Ling, Wm. A. Wheaton, P. Wallyn, R. T. Skelton, Wm. A. Mahoney, R. G. Radocinski, J. L. Callas, N. F. Ling, E. Turner, & R. Shubert.* 127, 79 (2000)

GAMMA RAYS: THEORY

High-Intensity Scattering Processes of Relativistic Electrons in Vacuum and Their Relevance to High-Energy Astrophysics. *Frederic V. Hartemann, Anthony L. Troha, Hector A. Baldis, Atul Gupta, Arthur K. Kerman, Eric C. Landahl, Neville C. Luhmann, Jr., & James R. Van Meter.* 127, 347 (2000)

HYDRODYNAMICS

Prompt and Delayed Emission Properties of Gamma-Ray Bursts Observed with BeppoSAX. *F. Frontera, L. Amati, E. Costa, J. M. Muller, E. Pian, L. Piro, P. Soffitta, M. Tavani, A. Castro-Tirado, D. Dal Fiume, M. Feroci, J. Heise, N. Masetti, L. Nicastro, M. Orlandini, E. Palazzi, & R. Sari.* 127, 59 (2000)

Three-dimensional Simulations of Turbulent Compressible Convection. *David H. Porter & Paul R. Woodward.* 127, 159 (2000)

The Role of Mixing in Astrophysics. *D. Arnett.* 127, 213 (2000)

Formation of Initial Perturbation of Rayleigh-Taylor Instability in Supernovae and Laser-irradiated Targets—Is There Any Similarity? *H. Azechi, K. Shigemori, M. Nakai, N. Miyanaga, & H. Takabe.* 127, 219 (2000)

Analytical Study and Structure of a Stationary Radiative Shock. *Serge Bouquet, Romain Teyssier, & Jean Pierre Chize.* 127, 245 (2000)

A New Supercritical Shock Wave Regime. *J. C. Bozler, J. P. Le Breton, T. Jalinaud, & J. Valadon.* 127, 253 (2000)

Development of a Radiative-Hydrodynamics Testbed Using the Petawatt Laser Facility. *Kimberly S. Budil, David M. Gold, Kent G. Estabrook, Bruce A. Remington, Jave Kane, Perry M. Bell, Deanna M. Pennington, Curtis Brown, Stephen P. Hatchett, Jeffrey A. Koch, Michael H. Key, & Michael D. Perry.* 127, 261 (2000)

Opacity Studies on Iron in the 15–30 eV Temperature Range. *Claude Chenais-Popovics, Hamed Merdji, Thomas Missalla, Franck Gilleron, Jean-Claude Gauthier, Thomas Blenski, François Perrot, Marcel Klapisch, Claire Bauche-Arnoult, Jacques Bauche, Annick Bachelier, & Klaus Eidmann.* 127, 275 (2000)

The Production of Strong Blast Waves through Intense Laser Irradiation of Atomic Clusters. *T. Ditmire, K. Shigemori, B. A. Remington, K. Estabrook, & R. A. Smith.* 127, 299 (2000)

Progress toward the Laboratory Simulation of Young Supernova Remnants. *R. P. Drake, T. B. Smith, J. J. Caroll III, Y. Yan, S. G. Glendinning, Kent Estabrook, D. D. Ryutov, B. A. Remington, R. J. Wallace, & R. McCray.* 127, 305 (2000)

Single-Mode, Nonlinear Mix Experiments at High Mach Number Using Nova. *David R. Farley & Larry M. Logoy.* 127, 311 (2000)

Using Balmer Line Shapes to Diagnose Physical Conditions in Collisionless Shock Waves. *Parviz Ghavamian, Patrick Hartigan, & J. C. Raymond.* 127, 323 (2000)

Experimental Measurements of Hydrodynamic Instabilities on Nova of Relevance to Astrophysics. *S. G. Glendinning, K. S. Budil, C. Cherfils, R. P. Drake, D. Farley, D. H. Kalantar, J. Kane, M. M. Marinak, B. A. Remington, A. Richard, D. Ryutov, J. Stone, R. J. Wallace, & S. V. Weber.* 127, 325 (2000)

Numerical Simulations of Deep Nonlinear Richtmeyer-Meshkov Instability. *Mary Jane Graham & Qiang Zhang.* 127, 339 (2000)

Supernova Experiments on the Nova Laser. *J. Kane, D. Arnett, B. A. Remington, S. G. Glendinning, G. Bazan, R. P. Drake, & B. A. Fryxell.* 127, 365 (2000)

Interaction of Supernova Remnants with Interstellar Clouds: From the Nova Laser to the Galaxy. *Richard I. Klein, Kimberly S. Budil, Theodore S. Perry, & David R. Bach.* 127, 379 (2000)

Vortex Dynamics of a Twice-accelerated Interface in an Incompressible Ideal Fluid. *Alexei D. Kotelnikov & Norman J. Zabusky.* 127, 389 (2000)

Temperature and Density Measurements of the Collision of Two Plasmas. *T. S. Perry, R. I. Klein, D. R. Bach, K. S. Budil, R. Cauble, H. N. Kornblum, Jr., R. J. Wallace, & R. W. Lee.* 127, 437 (2000)

Statistical Mechanics Merger Model for Hydrodynamic Instabilities.
A. Rikanati, D. Oron, U. Alon, & D. Shvarts. 127, 451 (2000)

Criteria for Scaled Laboratory Simulations of Astrophysical MHD Phenomena.
D. D. Ryutov, R. P. Drake, & B. A. Remington. 127, 465 (2000)

Studies on the Nonlinear Evolution of the Richtmeyer-Meshkov Instability.
O. Sadot, L. Erez, D. Oron, G. Erez, G. Ben-Dor, U. Alon, L. A. Levin, & D. Shvarts. 127, 469 (2000)

Shock Wave Stability in Steep Density Gradients. *Re'em Sari, Eli Waxman, & Dov Shvarts.* 127, 475 (2000)

The Effects of New Nuclear Reaction Rates and Opacities on Hydrodynamic Simulations of the Nova Outburst. *S. Starrfield, W. M. Sparks, J. W. Truran, & M. C. Wiescher.* 127, 485 (2000)

The Effect of Boundary Conditions on Rayleigh-Taylor Instability. *Defne Ucer & Vladimir V. Mirnov.* 127, 509 (2000)

Study of Super- and Subsonic Ionization Fronts in Low-Density, Soft X-Ray-irradiated Foam Targets. *O. Willi, L. Barringer, C. Vickers, & D. Hoarty.* 127, 527 (2000)

INFRARED: ISM: LINES AND BANDS

A Visual Search for Galaxies in a Milky Way Region around the North Supergalactic Pole. *Adel T. Roman, Ikuru Iwata, & Mamoru Saitō.* 127, 27 (2000)

INSTABILITIES

Formation of Initial Perturbation of Rayleigh-Taylor Instability in Supernovae and Laser-irradiated Targets—Is There Any Similarity? *H. Azechi, K. Shigemori, M. Nakai, N. Miyanaga, & H. Takabe.* 127, 219 (2000)

X-Ray Emission from Comets, Cometary Knots, and Supernova Remnants. *R. Bingham, B. J. Kellett, J. M. Dawson, V. D. Shapiro, & D. A. Mendis.* 127, 233 (2000)

Progress toward the Laboratory Simulation of Young Supernova Remnants. *R. P. Drake, T. B. Smith, J. J. Carroll III, Y. Yan, S. G. Glendinning, Kent Estabrook, D. D. Ryutov, B. A. Remington, R. J. Wallace, & R. McCray.* 127, 305 (2000)

Single-Mode, Nonlinear Mix Experiments at High Mach Number Using Nova. *David R. Farley & Larry M. Logory.* 127, 311 (2000)

Experimental Measurements of Hydrodynamic Instabilities on Nova of Relevance to Astrophysics. *S. G. Glendinning, K. S. Budil, C. Cherfils, R. P. Drake, D. Farley, D. H. Kalantar, J. Kane, M. M. Marinak, B. A. Remington, A. Richard, D. Ryutov, J. Stone, R. J. Wallace, & S. V. Weber.* 127, 325 (2000)

Numerical Simulations of Deep Nonlinear Richtmeyer-Meshkov Instability. *Mary Jane Graham & Qiang Zhang.* 127, 339 (2000)

Developing Solid-State Experiments on the Nova Laser. *D. H. Kalantar, B. A. Remington, E. A. Chandler, J. D. Colvin, D. M. Gold, K. O. Mikaelian, S. V. Weber, L. G. Wiley, J. S. Wark, A. Loveridge, A. Hauer, B. H. Failor, M. A. Meyers, & G. Ravichandran.* 127, 357 (2000)

Supernova Experiments on the Nova Laser. *J. Kane, D. Arnett, B. A. Remington, S. G. Glendinning, G. Bazan, R. P. Drake, & B. A. Fryxell.* 127, 365 (2000)

Statistical Mechanics Merger Model for Hydrodynamic Instabilities. *A. Rikanati, D. Oron, U. Alon, & D. Shvarts.* 127, 451 (2000)

Studies on the Nonlinear Evolution of the Richtmeyer-Meshkov Instability. *O. Sadot, L. Erez, D. Oron, G. Erez, G. Ben-Dor, U. Alon, L. A. Levin, & D. Shvarts.* 127, 469 (2000)

Shock Wave Stability in Steep Density Gradients. *Re'em Sari, Eli Waxman, & Dov Shvarts.* 127, 475 (2000)

The Effect of Boundary Conditions on Rayleigh-Taylor Instability. *Defne Ucer & Vladimir V. Mirnov.* 127, 509 (2000)

ISM: BUBBLES

Supernova Experiments on the Nova Laser. *J. Kane, D. Arnett, B. A. Remington, S. G. Glendinning, G. Bazan, R. P. Drake, & B. A. Fryxell.* 127, 365 (2000)

ISM: COSMIC RAYS

Gamma-Ray Bursts: Afterglow, High-Energy Cosmic Rays, and Neutrinos. *Eli Waxman.* 127, 519 (2000)

ISM: GENERAL

Interaction of Supernova Remnants with Interstellar Clouds: From the Nova Laser to the Galaxy. *Richard I. Klein, Kimberly S. Budil, Theodore S. Perry, & David R. Bach.* 127, 379 (2000)

ISM: JETS AND OUTFLOWS

Nova High-Speed Jet Experiments. *L. M. Logory, P. L. Miller, & P. E. Stry.* 127, 423 (2000)

Testing Astrophysical Radiation Hydrodynamics Codes with Hypervelocity Jet Experiments on the Nova Laser. *James M. Stone, Neal Turner, Kent Estabrook, Bruce Remington, David Farley, S. Gail Glendinning, & Siegfried Glenzer.* 127, 497 (2000)

ISM: KINEMATICS AND DYNAMICS

New *Hubble Space Telescope* Observations of the Shocks in Supernova Remnant SN 1987A. *Eli Michael.* 127, 429 (2000)

ISM: LINES AND BANDS

H_2 and $Br\gamma$ Narrowband Imaging of Bipolar Planetary Nebulae. *M. A. Guerrero, E. Villaver, A. Manchado, P. Garcia-Lario, & F. Prada.* 127, 125 (2000)

ISM: MOLECULES

H_2 and $Br\gamma$ Narrowband Imaging of Bipolar Planetary Nebulae. *M. A. Guerrero, E. Villaver, A. Manchado, P. Garcia-Lario, & F. Prada.* 127, 125 (2000)

ISM: PLANETARY NEBULAE: GENERAL

H_2 and $Br\gamma$ Narrowband Imaging of Bipolar Planetary Nebulae. *M. A. Guerrero, E. Villaver, A. Manchado, P. Garcia-Lario, & F. Prada.* 127, 125 (2000)

ISM: SUPERNOVA REMNANTS

X-Ray Emission from Comets, Cometary Knots, and Supernova Remnants. *R. Bingham, B. J. Kellett, J. M. Dawson, V. D. Shapiro, & D. A. Mendis.* 127, 233 (2000)

Development of a Radiative-Hydrodynamics Testbed Using the Petawatt Laser Facility. *Kimberly S. Budil, David M. Gold, Kent G. Estabrook, Bruce A. Remington, Jane Kane, Perry M. Bell, Deanna M. Pennington, Curtis Brown, Stephen P. Hatchett, Jeffrey A. Koch, Michael H. Key, & Michael D. Perry.* 127, 261 (2000)

Progress toward the Laboratory Simulation of Young Supernova Remnants. *R. P. Drake, T. B. Smith, J. J. Carroll III, Y. Yan, S. G. Glendinning, Kent Estabrook, D. D. Ryutov, B. A. Remington, R. J. Wallace, & R. McCray.* 127, 305 (2000)

Interaction of Supernova Remnants with Interstellar Clouds: From the Nova Laser to the Galaxy. *Richard I. Klein, Kimberly S. Budil, Theodore S. Perry, & David R. Bach.* 127, 379 (2000)

Electron Heating at Supernova Remnant Collisionless Shocks. *J. Martin Laming.* 127, 409 (2000)

New *Hubble Space Telescope* Observations of the Shocks in Supernova Remnant SN 1987A. *Eli Michael.* 127, 429 (2000)

Accelerating Shock Waves in a Laser-produced Density Gradient. *Romain Teyssier, Dmitri Ryutov, & Bruce Remington.* 127, 503 (2000)

LINE: PROFILES

Using Balmer Line Shapes to Diagnose Physical Conditions in Collisionless Shock Waves. *Parviz Ghavamian, Patrick Hartigan, & J. C. Raymond.* 127, 323 (2000)

MAGNETIC FIELDS

Modeling of the Expansion of Ultra-Short-Pulse Laser-produced Plasmas in Magnetic Fields. *Todd Ditmire, Alexandre Rubenchik, Vladimir V. Mirnov, & Defne Ucer.* 127, 293 (2000)

MAGNETOHYDRODYNAMICS: MHD

Intense Self-generated Magnetic Field in Relativistic Laser-Matter Interaction. *T. Lehner & L. Di Menza.* 127, 415 (2000)

Criteria for Scaled Laboratory Simulations of Astrophysical MHD Phenomena. *D. D. Ryutov, R. P. Drake, & B. A. Remington.* 127, 465 (2000)

Dense and Relativistic Plasmas Produced by Compact High-Intensity Lasers. *D. Umstadter, S.-Y. Chen, G. Ma, A. Maksimchuk, G. Mourou, M. Nantel, S. Pikuz, G. Sarkisov, & R. Wagner.* 127, 513 (2000)

METHODS: ANALYTICAL

Modeling of the Expansion of Ultra-Short-Pulse Laser-produced Plasmas in Magnetic Fields. *Todd Ditmire, Alexandre Rubenchik, Vladimir V. Mirnov, & Defne Ucer.* 127, 293 (2000)

The Effect of Boundary Conditions on Rayleigh-Taylor Instability. *Defne Ucer & Vladimir V. Mirnov.* 127, 509 (2000)

METHODS: LABORATORY

Implosions: An Experimental Testbed for High-Energy Density Physics. *C. A. Back, N. C. Woolsey, T. Missalla, O. L. Landen, S. B. Libby, L. S. Klein, & R. W. Lee.* 127, 227 (2000)

Development of a Radiative-Hydrodynamics Testbed Using the Petawatt Laser Facility. *Kimberly S. Budil, David M. Gold, Kent G. Estabrook, Bruce A. Remington, Dave Kane, Perry M. Bell, Deanna M. Pennington, Curtis Brown, Stephen P. Hatchett, Jeffrey A. Koch, Michael H. Key, & Michael D. Perry.* 127, 261 (2000)

Equation of State and Material Property Measurements of Hydrogen Isotopes at the High-Pressure, High-Temperature Insulator-Metal Transition. *R. Cauble, P. M. Celliers, G. W. Collins, L. B. da Silva, D. M. Gold, M. E. Foord, K. S. Budil, R. J. Wallace, & A. Ng.* 127, 267 (2000)

Opacity Studies on Iron in the 15–30 eV Temperature Range. *Claude Chenaïs-Popovics, Hamed Merdji, Thomas Missalla, Franck Gilleron, Jean-Claude Gauthier, Thomas Blenski, François Perrot, Marcel Klapisch, Claire Bauche-Arnoult, Jacques Bauche, Annick Bachelier, & Klaus Eidmann.* 127, 275 (2000)

Modeling of the Expansion of Ultra-Short-Pulse Laser-produced Plasmas in Magnetic Fields. *Todd Ditmire, Alexandr Rubenchik, Vladimir V. Mirnov, & Defne Ucer.* 127, 293 (2000)

Single-Mode, Nonlinear Mix Experiments at High Mach Number Using Nova. *David R. Farley & Larry M. Logory.* 127, 311 (2000)

Self-shielded Downflows in Core-Collapse Supernovae: Prospects for Laser Experiments. *Chris L. Fryer.* 127, 317 (2000)

Experimental Measurements of Hydrodynamic Instabilities on Nova of Relevance to Astrophysics. *S. G. Glendinning, K. S. Budil, C. Cherfils, R. P. Drake, D. Farley, D. H. Kalantar, J. Kane, M. M. Marinak, B. A. Remington, A. Richard, D. Ryutov, J. Stone, R. J. Wallace, & S. V. Weber.* 127, 325 (2000)

Interferometric and Chirped Optical Probe Techniques for High-Pressure Equation-of-State Measurements. *D. M. Gold, P. M. Celliers, G. W. Collins, K. S. Budil, R. Cauble, L. B. da Silva, M. E. Foord, R. E. Stewart, R. J. Wallace, & D. Young.* 127, 333 (2000)

Numerical Simulations of Deep Nonlinear Richtmeyer-Meshkov Instability. *Mary Jane Graham & Qiang Zhang.* 127, 339 (2000)

High-Intensity Scattering Processes of Relativistic Electrons in Vacuum and Their Relevance to High-Energy Astrophysics. *Frederic V. Hartemann, Anthony L. Troha, Hector A. Baldis, Atul Gupta, Arthur K. Kerman, Eric C. Landahl, Neville C. Luhmann, Jr., & James R. Van Meter.* 127, 347 (2000)

Developing Solid-State Experiments on the Nova Laser. *D. H. Kalantar, B. A. Remington, E. A. Chandler, J. D. Colvin, D. M. Gold, K. O. Mikaelian, S. V. Weber, L. G. Wiley, J. S. Wark, A. Loveridge, A. Hauer, B. H. Failor, M. A. Meyers, & G. Ravichandran.* 127, 357 (2000)

Supernova Experiments on the Nova Laser. *J. Kane, D. Arnett, B. A. Remington, S. G. Glendinning, G. Bazan, R. P. Drake, & B. A. Fryxell.* 127, 365 (2000)

A Cubic Micron of Equilibrium Pair Plasma? *J. I. Katz.* 127, 371 (2000)

EOS Data Experiments for Plastic Foams Using Smoothed Laser Beams. *Michel Koenig, Alessandra Benuzzi, Bernard Faral, Dimitri Batani, Laura Müller, Flavia Torsiello, Tom Hall, Nicolas Grandjouan, & Wigen Nazarov.* 127, 385 (2000)

Nova High-Speed Jet Experiments. *L. M. Logory, P. L. Miller, & P. E. Stry.* 127, 423 (2000)

Opacity Measurements in a Hot Dense Medium on the Nova Laser. *T. S. Perry, S. J. Davidson, F. J. D. Serduke, D. R. Bach, C. C. Smith, J. M. Foster, R. J. Doyas, R. A. Ward, C. A. Iglesias, F. J. Rogers, J. Abdallah, Jr., R. E. Stewart, R. J. Wallace, J. D. Kilkenny, & R. W. Lee.* 127, 433 (2000)

Temperature and Density Measurements of the Collision of Two Plasmas. *T. S. Perry, R. I. Klein, D. R. Bach, K. S. Budil, R. Cauble, H. N. Kornblum, Jr., R. J. Wallace, & R. W. Lee.* 127, 437 (2000)

Criteria for Scaled Laboratory Simulations of Astrophysical MHD Phenomena. *D. D. Ryutov, R. P. Drake, & B. A. Remington.* 127, 465 (2000)

Testing Astrophysical Radiation Hydrodynamics Codes with Hypervelocity Jet Experiments on the Nova Laser. *James M. Stone, Neal Turner, Kent Estabrook, Bruce Remington, David Farley, S. Gail Glendinning, & Siegfried Glenzer.* 127, 497 (2000)

Study of Super- and Subsonic Ionization Fronts in Low-Density, Soft X-Ray-irradiated Foam Targets. *O. Willi, L. Barringer, C. Vickers, & D. Hoarty.* 127, 527 (2000)

METHODS: NUMERICAL

Three-dimensional Simulations of Turbulent Compressible Convection. *David H. Porter & Paul R. Woodward.* 127, 159 (2000)

The Role of Mixing in Astrophysics. *D. Arnett.* 127, 213 (2000)

Numerical Simulations of Blast Waves Generated by an Impulsive Temperature Source. *K. Keilty, E. Liang, B. Remington, R. London, K. Estabrook, & J. Kane.* 127, 375 (2000)

Vortex Dynamics of a Twice-accelerated Interface in an Incompressible Ideal Fluid. *Alexei D. Kotelnikov & Norman J. Zabusky.* 127, 389 (2000)

Accelerating Shock Waves in a Laser-produced Density Gradient. *Romain Tessier, Dmitri Ryutov, & Bruce Remington.* 127, 503 (2000)

NUCLEAR REACTIONS, NUCLEOSYNTHESIS, ABUNDANCES

Effects of Jetlike Explosion in SN 1987A. *Shigehiro Nagataki.* 127, 141 (2000)

The Role of Mixing in Astrophysics. *D. Arnett.* 127, 213 (2000)

Some Startling Discoveries about X-Ray Bursts. *D. Q. Lamb.* 127, 395 (2000)

The Effects of New Nuclear Reaction Rates and Opacities on Hydrodynamic Simulations of the Nova Outburst. *S. Starrfield, W. M. Sparks, J. W. Truran, & M. C. Wiescher.* 127, 485 (2000)

PLASMAS

Implosions: An Experimental Testbed for High-Energy Density Physics. *C. A. Back, N. C. Woolsey, T. Missalla, O. L. Landen, S. B. Libby, L. S. Klein, & R. W. Lee.* 127, 227 (2000)

Photoabsorption in Dense Plasmas. *T. Blenski.* 127, 239 (2000)

Modeling of the Expansion of Ultra-Short-Pulse Laser-produced Plasmas in Magnetic Fields. *Todd Ditmire, Alexandr Rubenchik, Vladimir V. Mirnov, & Defne Ucer.* 127, 293 (2000)

The Production of Strong Blast Waves through Intense Laser Irradiation of Atomic Clusters. *T. Ditmire, K. Shigemori, B. A. Remington, K. Estabrook, & R. A. Smith.* 127, 299 (2000)

Interferometric and Chirped Optical Probe Techniques for High-Pressure Equation-of-State Measurements. *D. M. Gold, P. M. Celliers, G. W. Collins, K. S. Budil, R. Cauble, L. B. da Silva, M. E. Foord, R. E. Stewart, R. J. Wallace, & D. Young.* 127, 333 (2000)

High-Intensity Scattering Processes of Relativistic Electrons in Vacuum and Their Relevance to High-Energy Astrophysics. *Frederic V. Hartemann, Anthony L. Troha, Hector A. Baldis, Atul Gupta, Arthur K. Kerman, Eric C. Landahl, Neville C. Luhmann, Jr., & James R. Van Meter.* 127, 347 (2000)

A Cubic Micron of Equilibrium Pair Plasma? *J. I. Katz.* 127, 371 (2000)

EOS Data Experiments for Plastic Foams Using Smoothed Laser Beams. *Michel Koenig, Alessandra Benuzzi, Bernard Faral, Dimitri Batani, Laura Müller, Flavia Torsiello, Tom Hall, Nicolas Grandjouan, & Wigen Nazarov.* 127, 385 (2000)

Intense Self-generated Magnetic Field in Relativistic Laser-Matter Interaction. *T. Lehner & L. Di Menza.* 127, 415 (2000)

Opacity Measurements in a Hot Dense Medium on the Nova Laser. *T. S. Perry, S. J. Davidson, F. J. D. Serduke, D. R. Bach, C. C. Smith, J. M. Foster, R. J. Doyas, R. A. Ward, C. A. Iglesias, F. J. Rogers, J. Abdallah, Jr., R. E. Stewart, R. J. Wallace, J. D. Kilkenny, & R. W. Lee.* 127, 433 (2000)

Temperature and Density Measurements of the Collision of Two Plasmas. *T. S. Perry, R. I. Klein, D. R. Bach, K. S. Budil, R. Cauble, H. N. Kornblum, Jr., R. J. Wallace, & R. W. Lee.* 127, 437 (2000)

Light Scattering by a Relativistic Plasma Driven by an Ultraintense Laser Source. *Luis Plaja, Enrique Conejero Jarque, & Luis Roso.* 127, 445 (2000)

Modeling of Thomson Scattering Spectra in High- z , Laser-produced Plasmas. *W. Rozmus, S. H. Glenzer, K. G. Estabrook, H. A. Baldis, & B. J. MacGowan.* 127, 459 (2000)

Neutrino Kinetics in Dense Astrophysical Plasmas. *L. O. Silva, R. Bingham, J. M. Dawson, J. T. Mendonça, & P. K. Shukla.* 127, 481 (2000)

Dense and Relativistic Plasmas Produced by Compact High-Intensity Lasers. *D. Umstadter, S.-Y. Chen, G. Ma, A. Maksimchuk, G. Mourou, M. Nantel, S. Pikuz, G. Sarkisov, & R. Wagner.* 127, 513 (2000)

RADIATION MECHANISMS: NONTHERMAL

X-Ray Emission from Comets, Cometary Knots, and Supernova Remnants. *R. Bingham, B. J. Kellett, J. M. Dawson, V. D. Shapiro, & D. A. Mendis.* 127, 233 (2000)

Testing the Gamma-Ray Burst Blast-Wave Model: A Primer. *A. Crider & E. P. Liang.* 127, 283 (2000)

High-Intensity Scattering Processes of Relativistic Electrons in Vacuum and Their Relevance to High-Energy Astrophysics. *Frederic V. Hartemann, Anthony L. Troha, Hector A. Baldis, Atul Gupta, Arthur K. Kerman, Eric C. Landahl, Neville C. Luhmann, Jr., & James R. Van Meter.* 127, 347 (2000)

RADIATIVE TRANSFER

Formation of Initial Perturbation of Rayleigh-Taylor Instability in Supernovae and Laser-irradiated Targets—Is There Any Similarity? *H. Azechi, K. Shigemori, M. Nakai, N. Miyanaga, & H. Takabe.* 127, 219 (2000)

Analytical Study and Structure of a Stationary Radiative Shock. *Serge Bouquet, Romain Teyssier, & Jean Pierre Chieze.* 127, 245 (2000)

A New Supercritical Shock Wave Regime. *J. C. Bozier, J. P. Le Breton, T. Jalinaud, & J. Valadon.* 127, 253 (2000)

The Production of Strong Blast Waves through Intense Laser Irradiation of Atomic Clusters. *T. Ditmire, K. Shigemori, B. A. Remington, K. Estabrook, & R. A. Smith.* 127, 299 (2000)

RELATIVITY

Intense Self-generated Magnetic Field in Relativistic Laser-Matter Interaction. *T. Lehner & L. Di Menza.* 127, 415 (2000)

Light Scattering by a Relativistic Plasma Driven by an Ultraintense Laser Source. *Luis Plaja, Enrique Conejero Jarque, & Luis Roso.* 127, 445 (2000)

Dense and Relativistic Plasmas Produced by Compact High-Intensity Lasers. *D. Umstadter, S.-Y. Chen, G. Ma, A. Maksimchuk, G. Mourou, M. Nantel, S. Pikuz, G. Sarkisov, & R. Wagner.* 127, 513 (2000)

Gamma-Ray Bursts: Afterglow, High-Energy Cosmic Rays, and Neutrinos. *Eli Waxman.* 127, 519 (2000)

SCATTERING

High-Intensity Scattering Processes of Relativistic Electrons in Vacuum and Their Relevance to High-Energy Astrophysics. *Frederic V. Hartemann, Anthony L. Troha, Hector A. Baldis, Atul Gupta, Arthur K. Kerman, Eric C. Landahl, Neville C. Luhmann, Jr., & James R. Van Meter.* 127, 347 (2000)

Light Scattering by a Relativistic Plasma Driven by an Ultraintense Laser Source. *Luis Plaja, Enrique Conejero Jarque, & Luis Roso.* 127, 445 (2000)

SHOCK WAVES

Prompt and Delayed Emission Properties of Gamma-Ray Bursts Observed with BeppoSAX. *F. Frontera, L. Amati, E. Costa, J. M. Muller, E. Pian, L. Piro, P. Soffitta, M. Tavani, A. Castro-Tirado, D. Dal Fiume, M. Feroci, J. Heise, N. Masetti, L. Nicastro, M. Orlandini, E. Palazzi, & R. Sari.* 127, 59 (2000)

Implosions: An Experimental Testbed for High-Energy Density Physics. *C. A. Back, N. C. Woolsey, T. Missalla, O. L. Landen, S. B. Libby, L. S. Klein, & R. W. Lee.* 127, 227 (2000)

Analytical Study and Structure of a Stationary Radiative Shock. *Serge Bouquet, Romain Teyssier, & Jean Pierre Chieze.* 127, 245 (2000)

A New Supercritical Shock Wave Regime. *J. C. Bozier, J. P. Le Breton, T. Jalinaud, & J. Valadon.* 127, 253 (2000)

Development of a Radiative-Hydrodynamics Testbed Using the Petawatt Laser Facility. *Kimberly S. Budil, David M. Gold, Kent G. Estabrook, Bruce A. Remington, Jane Kane, Perry M. Bell, Deanna M. Pennington, Curtis Brown, Stephen P. Hatchett, Jeffrey A. Koch, Michael H. Key, & Michael D. Perry.* 127, 261 (2000)

Equation of State and Material Property Measurements of Hydrogen Isotopes at the High-Pressure, High-Temperature Insulator-Metal Transition. *R. Cauble, P. M. Celliers, G. W. Collins, L. B. da Silva, D. M. Gold, M. E. Foord, K. S. Budil, R. J. Wallace, & A. Ng.* 127, 267 (2000)

Testing the Gamma-Ray Burst Blast-Wave Model: A Primer. *A. Crider & E. P. Liang.* 127, 283 (2000)

The Production of Strong Blast Waves through Intense Laser Irradiation of Atomic Clusters. *T. Ditmire, K. Shigemori, B. A. Remington, K. Estabrook, & R. A. Smith.* 127, 299 (2000)

Progress toward the Laboratory Simulation of Young Supernova Remnants. *R. P. Drake, T. B. Smith, J. J. Carroll III, Y. Yan, S. G. Glendinning, Kent Estabrook, D. D. Ryutov, B. A. Remington, R. J. Wallace, & R. McCray.* 127, 305 (2000)

Single-Mode, Nonlinear Mix Experiments at High Mach Number Using Nova. *David R. Farley & Larry M. Logory.* 127, 311 (2000)

Using Balmer Line Shapes to Diagnose Physical Conditions in Collisionless Shock Waves. *Parviz Ghavamian, Patrick Hartigan, & J. C. Raymond.* 127, 323 (2000)

Interferometric and Chirped Optical Probe Techniques for High-Pressure Equation-of-State Measurements. *D. M. Gold, P. M. Celliers, G. W. Collins, K. S. Budil, R. Cauble, L. B. da Silva, M. E. Foord, R. E. Stewart, R. J. Wallace, & D. Young.* 127, 333 (2000)

Numerical Simulations of Deep Nonlinear Richtmeyer-Meshkov Instability. *Mary Jane Graham & Qiang Zhang.* 127, 339 (2000)

Developing Solid-State Experiments on the Nova Laser. *D. H. Kalantar, B. A. Remington, E. A. Chandler, J. D. Colvin, D. M. Gold, K. O. Mikaelian, S. V. Weber, L. G. Wiley, J. S. Wark, A. Loveridge, A. Hauer, B. H. Failor, M. A. Meyers, & G. Ravichandran.* 127, 357 (2000)

Supernova Experiments on the Nova Laser. *J. Kane, D. Arnett, B. A. Remington, S. G. Glendinning, G. Bazan, R. P. Drake, & B. A. Fryxell.* 127, 365 (2000)

Numerical Simulations of Blast Waves Generated by an Impulsive Temperature Source. *K. Keily, E. Liang, B. Remington, R. London, K. Estabrook, & J. Kane.* 127, 375 (2000)

Interaction of Supernova Remnants with Interstellar Clouds: From the Nova Laser to the Galaxy. *Richard I. Klein, Kimberly S. Budil, Theodore S. Perry, & David R. Bach.* 127, 379 (2000)

Vortex Dynamics of a Twice-accelerated Interface in an Incompressible Ideal Fluid. *Alexei D. Kotelnikov & Norman J. Zabusky.* 127, 389 (2000)

Electron Heating at Supernova Remnant Collisionless Shocks. *J. Martin Laming.* 127, 409 (2000)

Nova High-Speed Jet Experiments. *L. M. Logory, P. L. Miller, & P. E. Stry.* 127, 423 (2000)

New *Hubble Space Telescope* Observations of the Shocks in Supernova Remnant SN 1987A. *Eli Michael.* 127, 429 (2000)

Temperature and Density Measurements of the Collision of Two Plasmas. *T. S. Perry, R. I. Klein, D. R. Bach, K. S. Budil, R. Cauble, H. N. Kornblum, Jr., R. J. Wallace, & R. W. Lee.* 127, 437 (2000)

Criteria for Scaled Laboratory Simulations of Astrophysical MHD Phenomena. *D. D. Ryutov, R. P. Drake, & B. A. Remington.* 127, 465 (2000)

Studies on the Nonlinear Evolution of the Richtmeyer-Meshkov Instability. *O. Sados, L. Erez, D. Oron, G. Erez, G. Ben-Dor, U. Alon, L. A. Levin, & D. Shvarts.* 127, 469 (2000)

Shock Wave Stability in Steep Density Gradients. *Re'em Sari, Eli Waxman, & Dov Shvarts.* 127, 475 (2000)

Testing Astrophysical Radiation Hydrodynamics Codes with Hypervelocity Jet Experiments on the Nova Laser. *James M. Stone, Neal Turner, Kent Estabrook, Bruce Remington, David Farley, S. Gail Glendinning, & Siegfried Glenzer.* 127, 497 (2000)

Accelerating Shock Waves in a Laser-produced Density Gradient. *Romain Teyssier, Dmitri Ryutov, & Bruce Remington.* 127, 503 (2000)

Study of Super- and Subsonic Ionization Fronts in Low-Density, Soft X-Ray-irradiated Foam Targets. *O. Willi, L. Barringer, C. Vickers, & D. Hoarty.* 127, 527 (2000)

STARS: ATMOSPHERES

Effects of Jetlike Explosion in SN 1987A. *Shigehiro Nagataki.* 127, 141 (2000)

STARS: SUPERNOVAE: GENERAL

Formation of Initial Perturbation of Rayleigh-Taylor Instability in Supernovae and Laser-irradiated Targets—Is There Any Similarity? *H. Azechi, K. Shigemori, M. Nakai, N. Miyanaga, & H. Takabe.* 127, 219 (2000)

Single-Mode, Nonlinear Mix Experiments at High Mach Number Using Nova. *David R. Farley & Larry M. Logory.* 127, 311 (2000)

Self-shielded Downflows in Core-Collapse Supernovae: Prospects for Laser Experiments. *Chris L. Fryer.* 127, 317 (2000)

Numerical Simulations of Blast Waves Generated by an Impulsive Temperature Source. *K. Keily, E. Liang, B. Remington, R. London, K. Estabrook, & J. Kane.* 127, 375 (2000)

Accelerating Shock Waves in a Laser-produced Density Gradient. *Romain Teyssier, Dmitri Ryutov, & Bruce Remington.* 127, 503 (2000)

The Effect of Boundary Conditions on Rayleigh-Taylor Instability. *Defne Ucer & Vladimir V. Mirnov.* 127, 509 (2000)

STARS: SUPERNOVAE: INDIVIDUAL

Alphanumeric: SN 1987A

Supernova Experiments on the Nova Laser. *J. Kane, D. Arnett, B. A. Remington, S. G. Glendinning, G. Bazan, R. P. Drake, & B. A. Fryxell.* 127, 365 (2000)

New Hubble Space Telescope Observations of the Shocks in Supernova Remnant SN 1987A. *Eli Michael.* 127, 429 (2000)

STARS: WHITE DWARFS

The Effects of New Nuclear Reaction Rates and Opacities on Hydrodynamic Simulations of the Nova Outburst. *S. Starrfield, W. M. Sparks, J. W. Truran, & M. C. Wiescher.* 127, 485 (2000)

SUN: FLARES

Thermal-spatial Analysis of Medium and Large Solar Flares, 1976 to 1996. *Howard A. Garcia.* 127, 189 (2000)

SUN: INTERIOR

The Sun as an Equation-of-State Laboratory. *Werner Däppen & Alan Nayfonov.* 127, 287 (2000)

SUN: OSCILLATIONS

The Sun as an Equation-of-State Laboratory. *Werner Däppen & Alan Nayfonov.* 127, 287 (2000)

SUN: X-RAYS, GAMMA RAYS

Thermal-spatial Analysis of Medium and Large Solar Flares, 1976 to 1996. *Howard A. Garcia.* 127, 189 (2000)

SURVEYS

A Visual Search for Galaxies in a Milky Way Region around the North Supergalactic Pole. *Adel T. Roman, Ikuru Iwata, & Mamoru Saitō.* 127, 27 (2000)

TECHNIQUES: INTERFEROMETRIC

Interferometric and Chirped Optical Probe Techniques for High-Pressure Equation-of-State Measurements. *D. M. Gold, P. M. Celliers, G. W. Collins, K. S. Budil, R. Cauble, L. B. da Silva, M. E. Foord, R. E. Stewart, R. J. Wallace, & D. Young.* 127, 333 (2000)

TURBULENCE

Three-dimensional Simulations of Turbulent Compressible Convection. *David H. Porter & Paul R. Woodward.* 127, 159 (2000)

X-Ray Emission from Comets, Cometary Knots, and Supernova Remnants. *R. Bingham, B. J. Kellett, J. M. Dawson, V. D. Shapiro, & D. A. Mendis.* 127, 233 (2000)

Single-Mode, Nonlinear Mix Experiments at High Mach Number Using Nova. *David R. Farley & Larry M. Logory.* 127, 311 (2000)

Vortex Dynamics of a Twice-accelerated Interface in an Incompressible Ideal Fluid. *Alexei D. Kotelnikov & Norman J. Zabusky.* 127, 389 (2000)

Studies on the Nonlinear Evolution of the Richtmeyer-Meshkov Instability. *O. Sadot, L. Erez, D. Oron, G. Erez, G. Ben-Dor, U. Alon, L. A. Levin, & D. Shvarts.* 127, 469 (2000)

X-RAYS: BURSTS

Some Startling Discoveries about X-Ray Bursts. *D. Q. Lamb.* 127, 395 (2000)

The Effect of Boundary Conditions on Rayleigh-Taylor Instability. *Defne Ucer & Vladimir V. Mirnov.* 127, 509 (2000)

X-RAYS: GENERAL

Prompt and Delayed Emission Properties of Gamma-Ray Bursts Observed with BeppoSAX. *F. Frontera, L. Amati, E. Costa, J. M. Muller, E. Pian, L. Piro, P. Soffitta, M. Tavani, A. Castro-Tirado, D. Dal Fiume, M. Feroci, J. Heise, N. Masetti, L. Nicastro, M. Orlando, E. Palazzi, & R. Sari.* 127, 59 (2000)

X-Ray Emission from Comets, Cometary Knots, and Supernova Remnants. *R. Bingham, B. J. Kellett, J. M. Dawson, V. D. Shapiro, & D. A. Mendis.* 127, 233 (2000)

Developing Solid-State Experiments on the Nova Laser. *D. H. Kalantar, B. A. Remington, E. A. Chandler, J. D. Colvin, D. M. Gold, K. O. Mikaelian, S. V. Weber, L. G. Wiley, J. S. Wark, A. Loveridge, A. Hauer, B. H. Failar, M. A. Meyers, & G. Ravichandran.* 127, 357 (2000)

Nova High-Speed Jet Experiments. *L. M. Logory, P. L. Miller, & P. E. Stry.* 127, 423 (2000)

Opacity Measurements in a Hot Dense Medium on the Nova Laser. *T. S. Perry, S. J. Davidson, F. J. D. Serduke, D. R. Bach, C. C. Smith, J. M. Foster, R. J. Doyas, R. A. Ward, C. A. Iglesias, F. J. Rogers, J. Abdallah, Jr., R. E. Stewart, R. J. Wallace, J. D. Kilkenny, & R. W. Lee.* 127, 433 (2000)

Temperature and Density Measurements of the Collision of Two Plasmas. *T. S. Perry, R. I. Klein, D. R. Bach, K. S. Budil, R. Cauble, H. N. Kornblum, Jr., R. J. Wallace, & R. W. Lee.* 127, 437 (2000)

Study of Super- and Subsonic Ionization Fronts in Low-Density, Soft X-Ray-irradiated Foam Targets. *O. Willi, L. Barringer, C. Vickers, & D. Hoarty.* 127, 527 (2000)

X-RAYS: STARS

Some Startling Discoveries about X-Ray Bursts. *D. Q. Lamb.* 127, 395 (2000)
